Graffiti Removers with Minimal Environmental Impact

BIOTEK's Bio-GREEN™ Graffiti Remover program consists of two environmentally-responsible products that perform as promised. Bio-GREEN™ Graffiti Remover for Painted Surfaces is ideal for interior use on painted surfaces where removal of the base layer must be kept to a minimum, and ghosting is to be avoided. Bio-GREEN™ Graffiti Remover for Unpainted Surfaces is perfect for concrete, stone, brick and metal where concern over an undercoat is not an issue. Unlike conventional graffiti remover products that can etch the stain into the surface these unique BioBased products in most situations the can remove many layers of graffiti in a single application.

The products in this program exceed all current Federal Environmental Regulatory requirements and are approved through the US-EPA DfE (Design for the Environment) Program. Bio-GREEN™ Graffiti Remover products are non-corrosive, toluene and acetone-free, VOC-compliant, non-toxic, non-carcinogenic, non-combustible, non-sensitizing, phosphate-free and APEO-free, including no NPEs. Bio-GREEN™ Graffiti Removers are ideal for public works, DOTs, public safety, schools and all out door applications. Our graffiti removers are 95% biodegraded in 30 days and can safely be used near the most sensitive aquatic environments.
